MATERIALS SCIENCE & ENGINEERING A

Subject Index of Volume 196

Adhesion
the effect of large oxygen additions on the wettability and work of adhesion of copper–oxygen alloys on polycrystalline alumina 111
Al/C
local interface response to dislocation strain fields at the Al/SiO_2 and Al/C boundary region 119
Al/SiO_2
local interface response to dislocation strain fields at the Al/SiO_2 and Al/C boundary region 119
Alkali metal impurities
effect of alkali metal impurities and cerium modification on the fatigue behaviour of 8090 alloy sheets 191
Alloy 800 H
biaxial path-dependence of low-cycle fatigue behaviour and microstructure of alloy 800 H at room temperature 19
Alloying
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205
Alloys
C_p measurements around the martensitic transformation temperature of a CuAlNi alloy 165
a new method to quantify the Portevin–Le Chatelier instabilities: application to aluminium–lithium alloys 79
microstructure and compression behaviour in the semisolid state of short-fibre-reinforced A356 aluminium alloys 33
the effect of large oxygen additions on the wettability and work of adhesion of copper–oxygen alloys on polycrystalline alumina 111
8090 alloy sheets
effect of alkali metal impurities and cerium modification on the fatigue behaviour of 8090 alloy sheets 191
Alumina composites
thermal expansion anisotropy in hot-pressed SiC-whisker-reinforced alumina composites 249
Aluminium
C_p measurements around the martensitic transformation temperature of a CuAlNi alloy 165
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9
microstructure and compression behaviour in the semisolid state of short-fibre-reinforced A356 aluminium alloys 33
Aluminium alloys
study of the damage mechanisms in an OSPREY™ Al alloy–SiC_p composite by scanning electron microscope in situ tensile tests 135
Aluminum–nitride interfaces
xenon ion induced atomic transport through aluminum–nitride interfaces 229
Al_2O_3/NiAl composites
thermal cycling response and oxidation behavior of Al_2O_3/NiAl composites with interfacial Mo Coating 197
Al_2O_3–ZrO_2–CeO_2 composites
microstructures of laser-treated Al_2O_3–ZrO_2–CeO_2 composites 253
Al–Fe–V–Si alloy
the microstructure of CO_2 laser welds in an Al–Fe–V–Si alloy 155
Al–Li binary alloys
effect of composition on crystallographic texture of hot-rolled Al–Li binary alloys 1
Annealing
annealing laser-melted ductile iron by pulsed Nd:YAG laser radiation 171
Atomic transport
xenon ion induced atomic transport through aluminum–nitride interfaces 229
Biaxial path-dependence
biaxial path-dependence of low-cycle fatigue behaviour and microstructure of alloy 800 H at room temperature 19
CaO–MgO–Al_2O_3
an exploratory study of producing non-silicate all-oxide composites by melt infiltration 183
Carbide
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205
Carbon steel
microstructure and electrochemical behavior of laser cladded Fe–Cr–Mo–Si–N surface alloys on carbon steel 243
Cerium modification
effect of alkali metal impurities and cerium modification on the fatigue behaviour of 8090 alloy sheets 191
Composites
application of nanocrystalline materials as matrices of composites: processing and performance advantages 105
Composition
effect of composition on crystallographic texture of hot-rolled Al–Li binary alloys 1
Compression
microstructure and compression behaviour in the semisolid state of short-fibre-reinforced A356 aluminium alloys 33
Copper
C_p measurements around the martensitic transformation temperature of a CuAlNi alloy 165
the effect of grain size on the microstructural evolution of copper deformed in rolling 97
the effect of large oxygen additions on the wettability and work of adhesion of copper–oxygen alloys on polycrystalline alumina 111
CO_2 laser welds
the microstructure of CO_2 laser welds in an Al–Fe–V–Si alloy 155
Creep
high temperature deformation and rupture in SiC–C composites 25

Elsevier Science S.A.

Crystallization
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
Crystallographic texture
effect of composition on crystallographic texture of hot-rolled Al–Li binary alloys 1
Crystals
application of nanocrystalline materials as matrices of composites: processing and performance advantages 105
cyclic deformation features in high purity titanium bicrystals 45
the effect of large oxygen additions on the wettability and work of adhesion of copper–oxygen alloys on polycrystalline alumina 111
Cu–Al–Ni shape memory alloy
influence of thermal cycling on the reversible martensitic transformation in a Cu–Al–Ni shape memory alloy 177

Damage
study of the damage mechanisms in an OSPREY™ Al alloy–SiC_p composite by scanning electron microscope in situ tensile tests 135
Deformation
cyclic deformation features in high purity titanium bicrystals 45
high temperature deformation and rupture in SiC–C composites 25
the effect of grain size on the microstructural evolution of copper deformed in rolling 97
Dislocation line energies
dislocation line energies and tensions of iron aluminides and iron silicides L1
Dislocation line tensions
dislocation line energies and tensions of iron aluminides and iron silicides L1
Dislocation strain fields
local interface response to dislocation strain fields at the Al/SiO_2 and Al/C boundary region 119
Dynamic recrystallization
effects of dynamic and metadynamic recrystallization on microstructures of wrought IN-718 due to hot deformation 89

Electrochemical behavior
microstructure and electrochemical behavior of laser cladded Fe–Cr–Mo–Si–N surface alloys on carbon steel 243
Embrittlement
mechanical properties of $(\alpha+\beta)$-titanium alloy at cryogenic temperatures 65
on the 45° embrittlement of tungsten sheets 129
the tensile properties of hot-rolled $(Al_2O_3)_p$–Al composites 71
Extrusion textures
influence of microstructures and particle concentrations on the development of extrusion textures in metal matrix composites 219

Fatigue behaviour
biaxial path-dependence of low-cycle fatigue behaviour and microstructure of alloy 800 H at room temperature 19
effect of alkali metal impurities and cerium modification on the fatigue behaviour of 8090 alloy sheets 191
Fe–Cr–Mo–Si–N alloys
microstructure and electrochemical behavior of laser cladded Fe–Cr–Mo–Si–N surface alloys on carbon steel 243
Fibres
microstructure and compression behaviour in the semisolid state of short-fibre-reinforced A356 aluminium alloys 33
Finite element method
finite element method simulations for two-phase material plastic strains 53
Flow
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
Fracture
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9
mechanical properties of $(\alpha+\beta)$-titanium alloy at cryogenic temperatures 65
on the 45° embrittlement of tungsten sheets 129
the tensile properties of hot-rolled $(Al_2O_3)_p$–Al composites 71

Glass-ceramic
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
Glass-forming ability
differences in the glass-forming ability of rapidly solidified and mechanically alloyed Ti–Ni–Cu alloys 237
Grain size
the effect of grain size on the microstructural evolution of copper deformed in rolling 97

Hexane
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205
High temperatures
high temperature deformation and rupture in SiC–C composites 25
Hot deformation
effects of dynamic and metadynamic recrystallization on microstructures of wrought IN-718 due to hot deformation 89
Hot pressing
thermal expansion anisotropy in hot-pressed SiC-whisker-reinforced alumina composites 249
Hot rolling
effect of composition on crystallographic texture of hot-rolled Al–Li binary alloys 1
Hydride
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205

Iron
annealing laser-melted ductile iron by pulsed Nd:YAG laser radiation 171
effect of laser processing parameters on the structure of ductile iron 145
Iron aluminides
dislocation line energies and tensions of iron aluminides and iron silicides L1
Iron silicides
dislocation line energies and tensions of iron aluminides and iron silicides L1

Laser processing
effect of laser processing parameters on the structure of ductile iron 145
Laser treatment
microstructures of laser-treated Al_2O_3–ZrO_2–CeO_2 composites 253
Lasers
annealing laser-melted ductile iron by pulsed Nd:YAG laser radiation 171

Local interface response
local interface response to dislocation strain fields at the Al/SiO_2 and Al/C boundary region 119

Martensite
C_p measurements around the martensitic transformation temperature of a CuAlNi alloy 165
Martensitic transformation
influence of thermal cycling on the reversible martensitic transformation in a Cu–Al–Ni shape memory alloy 177
Mechanical behaviour
a new method to quantify the Portevin–Le Chatelier instabilities: application to aluminium–lithium alloys 79
Mechanical properties
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
Melt infiltration
an exploratory study of producing non-silicate all-oxide composites by melt infiltration 183
Melt spinning
differences in the glass-forming ability of rapidly solidified and mechanically alloyed Ti–Ni–Cu alloys 237
Metadynamic recrystallization
effects of dynamic and metadynamic recrystallization on microstructures of wrought IN-718 due to hot deformation 89
Metal matrix composites
influence of microstructures and particle concentrations on the development of extrusion textures in metal matrix composites 219
Microstructure
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
biaxial path-dependence of low-cycle fatigue behaviour and microstructure of alloy 800 H at room temperature 19
effects of dynamic and metadynamic recrystallization on microstructures of wrought IN-718 due to hot deformation 89
influence of microstructures and particle concentrations on the development of extrusion textures in metal matrix composites 219
microstructure and electrochemical behavior of laser cladded Fe–Cr–Mo–Si–N surface alloys on carbon steel 243
microstructures of laser-treated Al_2O_3–ZrO_2–CeO_2 composites 253
the microstructure of CO_2 laser welds in an Al–Fe–V–Si alloy 155
Mo coating
thermal cycling response and oxidation behavior of Al_2O_3/NiAl composites with interfacial Mo Coating 197
Molybdenium
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9

Nickel
C_p measurements around the martensitic transformation temperature of a CuAlNi alloy 165
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9
Nitrogen-implanted iron
correlation between phase transformation and stress evolution in nitrogen-implanted iron 213
Non-silicate all-oxide composites
an exploratory study of producing non-silicate all-oxide composites by melt infiltration 183

Oxidation
thermal cycling response and oxidation behavior of Al_2O_3/NiAl composites with interfacial Mo Coating 197
Oxygen
the effect of large oxygen additions on the wettability and work of adhesion of copper–oxygen alloys on polycrystalline alumina 111

Particle concentrations
influence of microstructures and particle concentrations on the development of extrusion textures in metal matrix composites 219
Phase transformation
correlation between phase transformation and stress evolution in nitrogen-implanted iron 213
Plasticity
finite element method simulations for two-phase material plastic strains 53
Portevin–Le Chatelier instabilities
a new method to quantify the Portevin–Le Chatelier instabilities: application to aluminium–lithium alloys 79

Radiation
annealing laser-melted ductile iron by pulsed Nd:YAG laser radiation 171
Rolling
the effect of grain size on the microstructural evolution of copper deformed in rolling 97
Rupture
high temperature deformation and rupture in SiC–C composites 25

Shear
an experimental study on the influence of shear on the flow behavior, spontaneous crystallization, microstructure and mechanical properties of a fluorophlogopite glass-ceramic 261
SiC whiskers
thermal expansion anisotropy in hot-pressed SiC-whisker-reinforced alumina composites 249
SiC_p composite
study of the damage mechanisms in an OSPREY™ Al alloy–SiC_p composite by scanning electron microscope in situ tensile tests 135
SiC–C composites
high temperature deformation and rupture in SiC–C composites 25
Solidification
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9
Strain
finite element method simulations for two-phase material plastic strains 53
Stress evolution
correlation between phase transformation and stress evolution in nitrogen-implanted iron 213

Tensile tests
study of the damage mechanisms in an OSPREY™ Al alloy–SiC_p composite by scanning electron microscope in situ tensile tests 135
Texture
mechanical properties of $(\alpha+\beta)$-titanium alloy at cryogenic temperatures 65
on the 45° embrittlement of tungsten sheets 129
the tensile properties of hot-rolled $(Al_2O_3)_p$–Al composites 71

Thermal cycling
influence of thermal cycling on the reversible martensitic transformation in a Cu–Al–Ni shape memory alloy 177
thermal cycling response and oxidation behavior of Al_2O_3/NiAl composites with interfacial Mo Coating 197
Thermal expansion anistropy
thermal expansion anisotropy in hot-pressed SiC-whisker-reinforced alumina composites 249
Titanium
carbide and hydride formation during mechanical alloying of titanium and aluminium with hexane 205
cyclic deformation features in high purity titanium bicrystals 45
Ti–Ni–Cu alloys
differences in the glass-forming ability of rapidly solidified and mechanically alloyed Ti–Ni–Cu alloys 237
Toughness
a new method to quantify the Portevin–Le Chatelier instabilities: application to aluminium–lithium alloys 79
Tungsten
mechanical properties of $(\alpha+\beta)$-titanium alloy at cryogenic temperatures 65
on the 45° embrittlement of tungsten sheets 129
the tensile properties of hot-rolled $(Al_2O_3)_p$–Al composites 71
Vandium
fracture behavior of directionally solidified NiAl–Mo and NiAl–V eutectics 9
Xenon
xenon ion induced atomic transport through aluminum–nitride interfaces 229
